ADDICTION DISORDER (NYCPG)**

PEER SUPPORT FOR GAMBLING DISORDER COURSE DESCRIPTION

Gambling Disorder (GD), known as the Hidden Disease, lacks adequate support and treatment options in the U.S. Those affected often face co-occurring conditions, and while treatments exist for Substance Use Disorders (SUD) and Mental Illness (MI), GD remains largely unaddressed, with alarming suicide rates among problem gamblers. This course targets peer workers, teaching them to spot red flags, screen for gambling woes, connect folks to the proper care, and uncover support gaps.

COURSE OBJECTIVES

- Describe responsible gambling vs. problem gambling.
- Identify three high-risk populations.
- Describe three concepts of gambling-related harm.
- Identify two early warning signs of gaming & gambling disorder.
- Utilize two screening tools available.
- Help resolve barriers to treatment and support.
- Implement peer support for GD.

Join us in the groundbreaking pilot course.

The NH Council on Problem Gambling, with support from NH's own Choices Recovery Trainings and The Hope Center, proudly offers this In Person Pilot Training
